

Pioneer Valley Regional School Northfield, Massachusetts

Knight Consulting Engineers, Inc., provided structural and geotechnical engineering services for the 58,000 square foot addition, as well as major renovations to the original 55,000 square foot school. Renovations included upgrading the existing structural systems to meet current seismic codes and the addition of a band room above the existing cafeteria. Structural systems included steel framing, steel bracing and concrete masonry bearing and shear walls.

Client: Dore and Whittier, Inc.
